

A Second Chance at Life: 14-Year-Old Mustafa Awaits Life-Saving Kidney Transplant

New Delhi — Fourteen-year-old Mustafa is currently battling a life-threatening kidney condition that has drastically altered the course of his young life. Since November 2025, he has been undergoing regular dialysis and intensive medical care at Safdarjung Hospital under the supervision of Dr. Shobha Sharma, Head of the Nephrology Department.

Under the care of Dr. Shobha Sharma, Head of the Nephrology Department at Safdarjung Hospital, Mustafa has been receiving regular dialysis and critical treatment to keep his condition stable.

With the support of **Krishnavi Charitable Trust**, Mustafa's journey has continued with access to essential dialysis, blood tests, and life-saving medications. This support has been a lifeline for his family during an incredibly difficult time.

A Ray of Hope

Today, Mustafa stands on the brink of a life-changing moment.

He is ready for a kidney transplant.

In an extraordinary act of love, his mother has come forward as his donor, and all compatibility tests have been successfully completed. This transplant offers Mustafa a real chance at a healthy, normal life.

Why Your Support Matters

While the transplant brings hope, it also comes with significant medical expenses—including surgery, hospitalization, and long-term post-transplant care.

Your support can:

- Help cover the cost of the kidney transplant surgery
- Fund critical medications and recovery care
- Ensure continuous medical monitoring after the procedure

Be a Part of Mustafa's Journey

Your contribution can help Mustafa step out of the cycle of dialysis and into a future filled with possibilities—a future where he can go back to school, play, dream, and simply be a child again.

Every donation counts. Every share spreads hope.
